City of Napoleon, Ohio

CITY COUNCIL

SPECIAL MEETING AGENDA

Monday, April 10, 2023 at 6:15pm

LOCATION: Council Chambers, 255 West Riverview Avenue, Napoleon, Ohio

A. Call to Order

B. Public Hearing

1. An Application for Placement of Farmland in an Agriculture District filed by Bradley N. Hibbard for 10.0000 acers.

C. Adjournment

Marris Flogaus- Clerk

APPLICATION FOR PLACEMENT OF FARMLAND IN AN AGRICULTURAL DISTRICT

ODA-Ag. Adm. Form 11

(O.R.C. Section 929.02)

Rev 12/13/2018

(See page 4 for General Information regarding this Application)

Ag District Number: 180001

HIBBARD, BRADLEY N.
9-432 COUNTY ROAD L
MALINTA, OH 43535

**Return To:**

Liz Fruchey
Henry County Auditor's Office
P.O. Box 546
Napoleon, Ohio 43545-0545

A. Legal owner's name: HIBBARD, BRADLEY N., ETUX

Owner's Email (optional)

hadrwayfarms@yahoo.com

Owner's Phone (optional)

419-467-0734

Description of Land as Shown on Property Tax Statement:

RE-PLAT MAHNKE ORCHARDS LOT B

Location of Property:

Street or Road:

2950 ENTERPRISE AVENUE

County:

Henry

<u>District</u>	<u>Parcel Number</u>	<u>CAUV App #</u>	<u>Acres</u>
27	270500140000	1797	10.0000

Total number of acres for 1 parcels

10.0000

B. Does any of the land lie with a municipal corporation limit or subject to pending annexation?

Yes

No

If YES, REMEMBER a copy of this application must be submitted to the Clerk of the municipal legislative body

Enter the "internet identifier record" typically known as an electronic mail address, or any other designation used for self-identification or routing in internet communication or posting, provided for the purpose of receiving communication.

- C. Is the land presently being taxed at its current agricultural use valuation under Section 5713.31 of the Ohio Revised Code? Yes ☒ No ☐

If NO, complete the following showing how the land was used the past three years:

	ACRES		
	LAST YEAR	TWO YEARS AGO	THREE YEARS AGO
Cropland			
Permanent Pasture used for animal husbandry			
Woodland devoted to commercial timber and nursery stock			
Land Retirement or Conservation Program pursuant to an agreement with a federal agency			
Building areas devoted to agricultural production			
Roads, building areas, and all other areas not used for agricultural production			
Total Acres			

- D. Does the land for which the application is being made total 10 acres or more devoted exclusively to agricultural production or devoted to and qualified for payments or other compensation under a land retirement or conservation program under an agreement with an agency of the federal government? Yes ☒ No ☐ If this includes agritourism

If NO, complete the following:

1. Attach evidence of the gross income for each of the past 3 years, if the average yearly income from agricultural production was at least twenty-five hundred (\$2,500.00) dollars or more, or
2. If the owner anticipates that the land will produce an annual gross income of twenty-five hundred (\$2,500.00) dollars or more, evidence must be attached showing the anticipated gross income.

Authorization and Declaration

By signing this application, I authorize the county auditor or his duly appointed agent to inspect the property described above to verify the accuracy of this application. I declare this application (including accompanying exhibits) has been examined by me and to the best of my knowledge and belief is a true, accurate and correct application. I understand that land removed from this program before the 5-year enrollment period is subject to penalty, in accordance with Section 929.02(D) of the Ohio Revised Code.

March 31, 2023

PJM announces delays to base residual auctions

By Steve Lieberman – vice president of transmission and regulatory affairs

On March 27, PJM Interconnection, LLC (PJM) announced that its Board of Managers has directed it to seek Federal Energy Regulatory Commission (FERC) approval to delay all upcoming reliability pricing model (RPM) base residual auctions (BRAs) and incremental auctions (IAs) as necessary, including the auction for the 2025/2026 delivery year (June 1–May 31) currently scheduled to occur in June.

PJM's board points to the ongoing stakeholder effort that could result in reforms to the capacity construct as the reason to delay the currently scheduled BRAs and IAs. PJM's board "determined that PJM should postpone executing any further auctions under the current rules until we go through the stakeholder process and file resulting rule change proposals with FERC."

At present, PJM has not submitted its filing to FERC, which should include the delayed schedule. AMP anticipates a future *Update* article on this topic.

If you have questions, please contact me at 614.519.9168 or slieberman@ampppartners.org.

MISO announces delays to planning resource auction for delivery year 2023/24

By Steve Lieberman

On March 17, FERC issued an order to Midcontinent Independent System Operator, Inc. (MISO), establishing a show cause proceeding (Docket No. EL23-46-000) regarding seasonal accredited capacity (SAC) ratios for certain resources. FERC found that MISO was violating its tariff because it had failed to update its system-wide Unforced Capacity (UCAP)/Intermediate Seasonal Accredited Capacity (ISAC) ratio for the 2023/24 Planning Resource Auction despite having updated ISAC values for certain resources. Accordingly, FERC ordered MISO to either update the ratio that it uses to gauge anticipated supply or explain why it should not have to.

MISO reported that a software error counted previously excused generation outages against capacity accreditation, resulting in smaller capacity values than expected. MISO explained that it does not have time to implement the fixes necessary to its capacity model before it conducts the 2023/24 planning resource auction.

MISO now anticipates publishing auction results in mid-May, about a month behind schedule. The four seasonal auctions that were to be conducted concurrently in early April would have been the first to use a seasonal capacity framework.

If you have questions, please contact me at 614.519.9168 or slieberman@ampppartners.org.

AMP schedules four regional safety meeting

By Scott McKenzie – senior director of member training and safety

AMP has scheduled four regional safety meetings for this spring throughout the membership footprint. AMP Technical Services staff will provide a brief discussion on specific grounding changes included in the new APPA Safety Manual (17th Edition). During these meetings, Brent Jeffries, Bierer Meters Products, will discuss lineworker safety and tool training.

The following meetings have been scheduled:

- April 25: 841 E. Edgerton St. Bryan, OH 43506
- April 26: 365 Broad St. Wadsworth, OH 44281
- April 27: 1201 Schrock Ct. Columbus OH 43229
- May 16: 201 Hemm Ave. Piqua, OH 45356

Regional safety meetings are offered at no cost to members. Registration is required to be included in the lunch count.

To register, [click here](#). If you have questions about regional safety meetings, please contact Jennifer Flockerzie, AMP manager of technical services logistics, at 614.540.0853 or jflockerzie@amppartners.org.

Bob Bowman, AMP instructor/safety coordinator, and Jim Eberly, AMP safety/OSHA compliance coordinator, speak about the importance of using phasing sticks and grounding during a regional safety meeting held in Hamilton in 2022.

FirstEnergy Ohio March retail auction produces higher prices starting June 2023

By Charlie Cicci – power supply analyst

The third of three auctions for FirstEnergy Ohio — encompassing OhioEdison, ToledoEdison and The Cleveland Electric Illuminating Company (CEI) — to purchase 34 percent of their retail load starting in June 2023 was completed on March 20. The auction cleared at a price of \$83.75/megawatt hour (MWh) or 8.4 cents/kilowatt hour (kWh) with five suppliers winning the bids.

The first auction representing 33 percent of their retail load starting in June 2023 had cleared at a price of \$122.30/MWh or 12.2 cents/kWh, and the second auction representing 33 percent of their retail load had cleared at a price of \$97.70/MWh or 9.8 cents/kWh. Combining the results from the three auctions produces a weighted average price of \$101.08/MWh or 10.1 cents/kWh. This price compares to the average price that FirstEnergy Ohio paid for the current June 2022–May 2023 planning year of \$53.62/MWh or 5.4 cents/kWh, representing an increase of 4.7 cents/kWh.

Assuming all other costs remain unchanged, total residential rates would be expected to change as follows:

- OhioEdison customers would see their current total residential rate of around 13.3 cents/kWh increase to about 18.0 cents/kWh, representing a 35 percent increase.
- ToledoEdison customers would see their current total residential rate of approximately 13.7 cents/kWh increase to roughly 18.4 cents/kWh, representing a 34 percent increase.
- CEI customers would see their current total residential rate near 13.5 cents/kWh increase to the order of 18.2 cents/kWh, representing a 35 percent increase.

Information on FirstEnergy Ohio's retail auctions can be found at www.firstenergycbp.com.

Energy market update

By Jerry Willman – vice president of energy marketing

The May 2023 natural gas contract debuted yesterday as the prompt month and decreased \$0.080/MMBtu to close at \$2.104 yesterday. The EIA reported a withdrawal of 47 Bcf for the

week ending March 24, and was less than market expectations of 54 Bcf. Last year was an injection of 15 Bcf and the five-year average was -17 Bcf. Storage is now 1,853 Bcf, 31.3 percent above a year ago and 21 percent above the five-year average.

On-peak power prices for 2024 at AD Hub closed yesterday at \$45.27/MWh, which was \$7.03/MWh lower for the week.

AFEC weekly update

By Jerry Willman

The AMP Fremont Energy Center (AFEC) was in 2x1 configuration for the week. The plant cycled offline overnight last Saturday based on PJM economics. Duct firing operated for 49 hours this week. For the week, the plant generated at a 76.6 percent capacity factor, based on 675-megawatt (MW) rating.

Belleville and Meldahl hydroelectric plants receive Low-Impact Certification

By Adam Ward – senior vice president of member services, environmental affairs and policy

The [Low Impact Hydropower Institute](#) (LIHI) has certified the [Belleville](#) and [Meldahl](#) hydroelectric plants through its Low Impact Certification program. This is a voluntary program designed to recognize hydropower projects that minimize their impact on the environment.

The 10-year certification can increase the value of the associated renewable energy certificates in state renewable portfolio standards programs, and Green-e Energy, the nation's leading voluntary green power certification program.

If you have questions or would like more information on the certification, please contact me at 614.540.0946 or award@amppartners.org.

EPA issues final ozone federal implementation plan

By John McGreevy – assistant vice president of environmental health, safety and compliance

On March 15, 2023, the United States Environmental Protection Agency (EPA) finalized the Good Neighbor Rule (Rule) under the Clean Air Act and expanded the existing Cross State Air Pollution Rule trading program. The Rule seeks to further reduce nitrogen oxide (NOx) emissions from power plants and industrial sources (like cement kilns and glass furnaces) that contribute to downwind states' inability to attain or maintain compliance with EPA's 2015 Ozone National Ambient Air Quality Standards. Opponents have already expressed concerns that the rule will accelerate retirements of fossil generation, negatively impacting the reliability and affordability of power.

AMP's initial review of the Rule indicates that both AFEC and Prairie State Energy Campus have been allocated sufficient seasonal NOx allowances, and due to recent AMP actions, previously subject AMP and JV2 combustion turbines are no longer required to purchase and surrender NOx allowances.

We continue to work closely with partner organizations to monitor implementation of this rulemaking and will provide updates as circumstances necessitate. If you have any questions, please contact me at 614.623.7823 or jmcgreevy@amppartners.org.

Piqua student awarded AMP scholarship

By Amanda Smithey – member events and program manager

On March 28, Sam Schmiesing of Piqua was presented with a Richard H. Gorsuch Scholarship by Ed Krieger, Piqua Power System director, and Harry Phillips, AMP director of marketing and member relations. The one-time award of \$3,000 is presented annually to as many as five deserving students whose parent or guardian is an employee of AMP or an AMP member municipal electric system; or an employee or elected official who is in a position with the municipality to which the municipal electric system is subordinate. The scholarship was established in memory of Richard H. Gorsuch, who served as AMP's president from 1983 until his death in 1987 and who was dedicated to promoting the benefits of municipally owned electric utilities.

Sam, a graduating senior at Piqua High School, plans to attend the University of Dayton to study business management. The son of Chris and Paula Schmiesing, Sam has been a member of the football and track and field teams at his high school; has participated in the men's chorus; and has completed more than 70 hours of community service projects. His father, Chris, is the community and economic development director at the City of Piqua.

Please join us in congratulating Sam and wishing him great luck with his future endeavors.

Sam Schmiesing (center right) accepts the Richard H. Gorsuch Scholarship. He is pictured with (from left) his father, Chris Schmiesing, Ed Krieger and Harry Phillips.

Two weeks left to register for the 2023 AMP Technical Services Conference and NESC course

By Jennifer Flockerzie – manager of technical services logistics

Registration is open for the 2023 AMP Technical Services Conference and National Electric Safety Code (NESC) course, scheduled for April 11-12 at the Quest Conference Center in Columbus. Members are encouraged to [register here](#).

The Technical Services Conference will kick off at 8 a.m. on April 11. Day one will provide an opportunity to increase technical understanding and capabilities, learn about new products, strengthen relationships with other members as well as AMP staff, and exchange ideas with other utilities facing similar challenges. Vendors are invited to participate in the Vendor's Expo providing attendees with the opportunity to network with vendors throughout the day.

On April 12, attendees will have the opportunity to participate in a one-day course — "Major Changes and General Overview of the National Electric Safety Code® (NESC)." David J. Marne, P.E., author of McGraw Hill's NESC 2023 Handbook and a nationally recognized speaker on the NESC, will present the course, which will focus on the major changes in the 2023 edition and provide a general overview of the NESC.

Registration can be completed here: [2023 AMP Technical Services Conference](#).

If you have questions about the [AMP Technical Services Conference](#) or the NESC training course, or if you need help with registration, please contact me at 614.540.0853 or jflockerzie@amppartners.org.

Jeff Daniels joins AMP as senior transmission planning engineer

By Alex Lousos – director of transmission planning

Jeff Daniels, P.E., joined AMP on March 15 as senior transmission planning engineer. In his new role, Daniels will be responsible for supporting AMP Transmission (AMPT) PJM Regional

Transmission Expansion Plan (RTEP) activities by establishing, maintaining and ensuring an accurate representation of AMPT's transmission system for various electric system models.

Prior to joining AMP, Daniels served as senior engineer, substation maintenance for PPL Electric Utilities Corp., where he handled maintenance and repair engineering for 50 substations, conducted field investigations to verify issues identified by electrical repair crews, and created and prioritized repair/replace work orders within department budget allowances. He holds a Bachelor of Science in mechanical engineering from Bucknell University.

Please join me in welcoming Jeff to AMP.

Watch out for Silicon Valley Bank scams

Article provided by KnowBe4

Recently, Silicon Valley Bank (SVB) shut down due to failure to meet its financial obligations. This collapse has caused a public panic, and unfortunately, cybercriminals take advantage of high-profile news stories to catch your attention and manipulate your emotions.

Cybercriminals are expected to reference the collapse of SVB in phishing attacks and disinformation campaigns. Cybercriminals are already taking advantage of this event to try to steal your sensitive information. For example, cybercriminals may send you emails offering money or financial advice in response to the bank failure. These emails may appear to come from trusted financial services, but interacting with these emails can lead to cybercriminals taking your banking information or funds.

Follow the tips below to stay safe from similar scams:

- Always think before you click. Cyberattacks are designed to catch you off guard and trigger you to click impulsively.
- Watch out for sensational or shocking headlines about SVB. These headlines could lead to articles that contain disinformation, or false information designed to intentionally mislead you.
- Be cautious of unexpected payout opportunities. Remember, if something seems too good to be true, it probably is.

KnowBe4 is the world's largest integrated platform for security awareness training combined with simulated phishing attacks.

City of St. Clairsville seeks lineworker (beginning as a laborer)

The City of St. Clairsville is seeking candidates for the position of lineworker who will start work as a laborer. The rate of pay depends on the candidate's education and/or experience (base rate of \$17.59 per hour), plus full benefits. A first class or journeyman level of knowledge, skills and abilities is the preferred, but the city will consider training a candidate without that experience if a level of formal education has been achieved. Candidates must have some formal education from a vocational school or technical college in a lineworker training program, or have experience working as a lineworker apprentice, as a minimum qualification. The selected candidate, if less experienced, shall be expected to make steady progress toward attaining the position of first-class lineworker by demonstrating necessary knowledge, skills and abilities. The candidate shall

have 3 to 5 years from the date of hire to obtain this ranking, as a condition of employment provided steady progress is achieved. Depending on the experience level, the employee shall train under supervision in the areas of distribution/transmission, substation, high voltage line and system construction, and maintenance. The selected candidate will work initially on unenergized circuits and later work on energized circuits from lower to maximum system voltage. The work shall progress from assisted to unassisted duties. Candidates must learn to climb poles and work out of and operate a bucket truck and other relevant tools and equipment; must be available on a moment's notice for call out; must have a valid driver's license; and must be willing to attend formal training classes as determined by the employer. As a condition of acceptance on this job, candidates who are otherwise qualified will be required to take and pass the appropriate state/federal driver's licensing requirements and pass a pre-employment physical.

Please submit resume, application and documentation of specialized training/education by March 31 to: DOPS, City of St. Clairsville, Box 537, 100 North Market Street, St. Clairsville, OH 43950. Alternatively, please email the required information to: jgreenwood@stclairsville.com. View the posting and find the application [here](#).

Town of Bedford seeks electrical engineer

The Town of Bedford is seeking candidates for the position of electrical engineer. Bedford is a small town located between Lynchburg and Roanoke in central Virginia, home to a strong manufacturing base, a diverse business and arts community and the National D-Day Memorial. The electrical engineer's major duties are to perform intermediate professional and technical work in the design, maintenance, construction, installation and repair of our electric transmission and distribution system, SCADA system, diesel generators, hydro plant and other electric facilities. Bedford has 11 substations and roughly 300 miles of transmission and distribution lines. The electrical engineer's responsibilities also include coordinating with other utilities, working with builders and contractors on projects, assisting with budget preparation and other related duties work as needed. The electrical engineer reports to the director of the electric department.

The successful candidate must possess a degree in electrical engineering or other engineering major with some electric utility experience; comprehensive knowledge of the theories and principles of electrical transmission and distribution systems; knowledge of NEC, NESC and OSHA regulations. Candidates must be able to work with limited supervision, have excellent communication, customer service and interpersonal skills. Leadership experience is a plus. A professional engineering license is desired. All candidates must possess a valid Virginia driver's license. This position receives a competitive salary based on experience. The Town of Bedford has a competitive benefit package including health, dental, life, prescription card, vacation, pension, and tuition reimbursement. Applicants may send cover letter, resume and three references to: Bart Warner, Town of Bedford, 215 E. Main St., Bedford, Va. 24523 or email to hr@bedfordva.gov. Visit our web site at www.bedfordva.gov. Position open until filled. EOE. M/F/D encouraged to apply.

City of Bryan seeks candidates for two positions

Clerk treasurer

The City of Bryan is seeking applicants for the position of clerk treasurer. This position directs and monitors the city's financial planning, accounting, collection and custody of funds; controls disbursements; countersigns bonds and notes; certifies contracts and obligations for expenditures; and participates in investment of city funds. The clerk treasurer's office administers many aspects of the City of Bryan government. As an extension of all city services and city departments, the office provides daily operational support to city utilities, city income tax (with RITA), City Council, Board of Public Affairs and processes cemetery deeds. For accounts payable/receivable, the office handles purchase order maintenance, invoice processing, checking processing and distribution, and collection/receipting of all city revenues. The office also processes employee payroll; coordinates city employees' insurance benefit, and workers compensation; and handles new employee orientation.

Completion of post-secondary education in business, finance or accounting and five to 10 years of municipal finance experience, including work in municipal accounting, budgeting and

purchasing, and the supervision of others or any combination of training and work experience which indicates the position of the skills, knowledge and abilities as listed above. Candidate must possess strong leadership, financial, organizational and communication skills.

A complete job description may be found at www.cityofbryan.com. Please submit a resume by April 14, to City of Bryan, Attention Mayor's Office, 1399 East High Street, PO Box 190, Bryan, Ohio 43506; or e-mail to mayor@cityofbryan.com.

Operations manager

Bryan Municipal Utilities is seeking a motivated individual to join our team as operations manager. Responsibilities include providing leadership, guidance and support to all utility departments, ensuring that best practices are followed in the planning and coordination of projects, along with financial and fiscal accountability. This position also assists the director of utilities in negotiating contracts, strategic planning, interpreting financial data and assisting in the annual budget process.

Minimum qualifications and requirements include five years of experience in project management, engineering, construction management, business or a similar field. A bachelor's degree is highly desirable and preferred. An associate degree with broad knowledge in a general professional or technical field is also acceptable, or an equivalent combination of education, technical training and/or experience may be considered. Base salary and compensation are negotiable within the compensation plan and based on experience and qualifications. Bryan Municipal Utilities is an Equal Opportunity Employer.

Please submit a cover letter with resume to Bryan Municipal Utilities, 841 E. Edgerton St., Bryan, OH 43506; or email to humanresources@cityofbryan.com.

City of Niles seeks assistant superintendent

The City of Niles is seeking applicants for the position of assistant superintendent in the Light Department. This position is responsible for assisting the Light Department superintendent in supervising and assigning the work to be performed by the various crews. The work to be assigned and supervised will include the construction and maintenance of distribution substations and associated equipment. The assistant superintendent will be responsible for the supervision of the substation technician and the assistant substation technician and will also be responsible for the bookwork and testing of the apprentice lineworker program. This position is under the supervision of the superintendent of the Light Department.

The successful applicant will have knowledge of all phases of the electrical distribution system of the City of Niles; an ability to instruct other employees in the occupational hazards associated with electrical distribution work; a thorough knowledge of the theory and maintenance of substations and traffic signal controllers; the ability to identify causes of electrical interruptions and assembling the necessary personnel and equipment to restore power in a timely fashion; and knowledge of city streets, neighborhoods, boundaries and routes within the city for departmental purposes. Applicants must be knowledgeable about safety rules when on the road and in traffic; have computer proficiency, especially MS Office, Excel, etc.; have the ability to make decisions in accordance with the ordinances, regulations and department policies and procedures; maintain confidentiality of all information obtained; and have the ability to maintain an effective working relationship with other employees and the general public, especially in difficult and emergency situations. The successful applicant will have a high school diploma or GED equivalent, a valid Ohio driver's license and experience as journeyman lineworker and/or accredited substation schooling. A degree in electrical engineering or equal amount of experience, and experience in a supervisory position, preferably in a union environment, are preferred. A complete position description and application for employment are [available here](#).

City of Coldwater seeks engineering technician

The City of Coldwater is seeking applicants for the position of engineering technician. This position is responsible for supporting Coldwater design and operations, preparing and reviewing engineering and technical drawings as well as supporting the Geographic Information System

(GIS) department with data collection and entry. The technician will administer, develop, maintain and support engineering, mapping, GIS and modeling systems including Milsoft, ArcMap and ESRI; perform complex engineering calculations to support utility operations; produce design documents and drawings in CAD; review and prepare technical specifications for a project; prepare detailed engineering drawings to facilitate design and operations; provide engineering information in support of public works infrastructure; assist with engineering and management of capital projects; collect, enter and maintain engineering data to include, but not limited to, municipal and utility records, plans and maps; coordinate permit requests for pole attachments and right-of-way access; perform various technical services for operation, inspection and maintenance of various municipal and utility projects and assets; provide technical assistance and support for municipal and utility systems and assets; support the recording, filing and retrieval of as-built construction drawings; participate in various department meetings to support planning and sharing of project information; coordinate directly with customers, contractors and developers; prepare special purpose maps, charts, graphical layouts and other visual aid material; coordinate and support projects across multiple departments and organizations; and perform any/all other duties as assigned.

The successful applicant will be proficient with specialized industry-related software and applications such as AutoCAD; proficient with use of office computers, printers and software applications to include, but not be limited to, Microsoft Word, Excel, PowerPoint and Access; and will understand municipal and utility operations and terminology to include electric, water, wastewater, storm water, streets and GIS. Applicants should also have the ability to work both independently and as a team member within a multi-disciplined municipal utility operation; outstanding technical skills; excellent verbal and written communication skills; attention to detail; and knowledge of proper safety procedures. Candidates must have a high school diploma/GED equivalent and a valid driver's license. A college degree in technical related field of study and/or equivalent work experience required, civil or electrical engineering and project management experience is preferred. Experience with municipal and utility construction practices and recordkeeping is a plus. See the full job description and [apply here](#).

City of Bowling Green seeks park maintenance specialist

The City of Bowling Green is seeking applicants for the position of park maintenance specialist. This hourly, full-time position is responsible for ensuring that park grounds, buildings and sports facilities are properly maintained. The specialist prepares facilities for rentals; cleans restrooms and buildings; maintains and operates equipment; maintains grounds; prepares athletic fields; checks mechanical pool operations; prepares for special events; and performs other related duties as assigned. The specialist must be able to work various shifts and weekends. Applicants should have a high school diploma or equivalent; certification/licenses include first aid/CPR (ability to obtain within six months of hire); Certified Pool Operator (ability to obtain within six months of hire); commercial applicator license (or ability to obtain within 12 months of hire); one to six months relevant experience; valid Ohio driver's license. A copy of the job description will be provided, but is also [available here](#).

Employees accrue vacation leave and sick leave per the collective bargaining agreement. You can review the collective bargaining agreement at www.bgohio.org/bgco.
